

Cyber Cafe User and Admin Guide

Step-by-step operating guide for the current project

1. Login Methods

- Admin can sign in with admin / admin123
- User can sign in with user1 / user123
- Google sign-in is available when Google OAuth credentials are configured

2. Admin Guide

2.1 Manage Stations

- Open the Computer Stations page
- Choose 1 Hr, 2 Hr, or 3 Hr
- Enter the customer name and start the session
- Release the station when the customer finishes

2.2 Retail POS

- Open Retail POS
- Add items to cart
- Review the total and continue to payment

2.3 Payment Verification

- Display the QR to the customer
- Collect payment screenshot upload
- Open the Payments page
- Review amount and proof image
- Verify or reject the payment

3. User Guide

- Sign in from the main login screen
- Check current rank, sessions, and total spent
- Review available computer stations
- View current pricing for cafe services and products

4. Troubleshooting

- If Google login shows access blocked, verify redirect URIs in Google Cloud Console
- If payment proof upload fails, make sure the file is PNG, JPG, JPEG, or WEBP
- If data disappears after restart, that is expected in the current in-memory version

- If the QR details are wrong, update PAYMENT_UPI_ID and PAYMENT_RECEIVER in the environment
